Author Index to Volume 13

Astrachan, O., 283

Baumgartner, P., 339
Bonacina, M. P., 1
Bonatti, P. A., 35

d'Agostino, M., 243

Fernández, J. A., 117
Fitting, M., 175
Furbach, U., 339

Gabbay, D. M., 243
Goller, C., 297

Hähnle, R., 211
Hsiang, J., 1

Inoue, K., 145

Johnson, C. A., 83

Letz, R., 297
Lorenz, S., 375

Mayr, K., 297
Miglioli, P., 361
Minker, J., 117
Moscato, U., 361

Ornaghi, M., 361

Pliuškevičius, R., 391

Risch, V., 223

Sakama, C., 145
Schmitt, P. H., 211
Schumann J., 409
Schwind, C. B., 223
Stickel, M. E., 189

Wrightson, G., 173

Yahya, A., 117
Yuan, L.-Y., 69

Subject Index to Volume 13

abduction, 189
abductive frameworks, 35
analytic deduction, 243
analytic tableaux, 243
autoepistemic logic, 69
automated theorem provers, 411

caching, 189
clause graphs, 83
closed world assumption, 145
connection method, 297
contraction, 1
contrapositives, 339
controlled derivation, 243
cut rule, 297

default logic, 223
default logic and logic programming, 69
disjunctive deductive database, 117
disjunctive logic programs, 145
distrubuted deduction, 1
domain minization, 375
duplications, 361

entailment, 375
extension of SLDNF-resolution, 35

first-order logic, 297
formal integration of heterogeneous program modules, 35
high-performance computing, 283

idefinite information, 117
intuitionistic logic, 361

knowledge representation, 69
Kripke models, 361

labelled deductive systems, 243
lemmata, 297

logic programming, 175, 339

mechanical theorem proving, 211
meta-interpretation, 189
model elimination, 189, 283, 297, 339
model generation procedure, 145

nonmonotonic logic, 223, 375
nonmonotonic reasoning, 69

ordered model trees, 117

parallel theorem proving, 1
possible model semantics, 145
possible world semantics, 243
Proflog, 175
proof theory of linear temporal logic, 393
PTTP-technique, 339
purity, 83

refutation systems, 361
resolution, 83
resource logics, 243

sequent and tableau systems, 393
substructural logics, 243
supervaluations, 175

tableau, 175
tableau-based provers, 411
tableau calculus, 211
tableau prover, 375
tableaux, 223, 297
termination, 83
theorem proving, 283, 297

unifying frameworks for logic programming, 35

3-valued autoepitemic logic and its proof-theory, 35
